About Leadership Capabilities

This report provides 360° feedback on your strengths and opportunities based on a set of Leadership Capabilities that differentiate outstanding performance in senior executive roles. The capabilities in this report are scaled, with levels of capability increasing by complexity and scope. The scales offer you a roadmap of behaviors you can develop to be more effective as you move into larger, more complex roles. The scales are organized into three categories:

- Functional – when an executive is demonstrating the raw capital of a capability
- Focused – when an executive is actively using the capability
- Complex – when an executive is having a more leveraged impact

Interpreting the report

This report consists of multiple sections, providing different views of the data to help you make the most of your feedback. We recommend the following process.

1. First review your Current Business Challenges and Future Aspirations (section 2)
This will provide you with some context to consider as you go through the report.
2. Review the Summary Profile of your Leadership Capabilities (section 4)
Identify your key strengths and opportunities for improvement; and any gaps in terms of how others see you compared to how you see yourself.
3. Review the Highest- and Lowest-Rated Elements (section 5)
To help summarize potential opportunities for development, as well as strengths to leverage.
4. Review the Leadership Capabilities in Depth (section 6)
Explore the elements that may be driving strengths or development opportunities in each capability and identify differences in ratings by feedback provider groups. This section is not intended to be read from beginning to end, but rather to explore specific capabilities and elements in depth.
5. Finally review the Written Comments (section 7)
Identify patterns and connections between those comments and the numerical ratings you received on the capabilities.

What are the most significant business challenges you are currently facing?

Biggest challenge is the collaboration among various stake holders. I want all the teams to work as one unit,.

What aspects of your job do you enjoy the most; or find most energizing?

Interacting with the team, understanding business, trying to address patient's needs

What aspects of your job do you find most frustrating?

None

What are your long-term goals and aspirations? Not just in your next role, but where you would like to be, or what would you like to be doing in 5-10 years.

I would like leave a big impact in patients life, I want to make sure the health care is affordable to all.

Tips

1. Review your responses to the questions above to make sure they are still relevant. Update them as needed.
2. As you review the feedback in the rest of this report, reflect on how it relates to handling your business challenges as well as serving towards your future aspirations.
 - How can you best leverage your strengths?
 - What development needs should you address?
3. As you formulate your development action plan, identify how it will help you address both current challenges and serve you towards your aspirations.

This section provides verbatim written comments that complement the numerical ratings you received. Look for patterns and connections between the written comments and the numerical ratings.

The comments were provided in response to the following questions:

- What does this person do especially well that you would like him/her to continue to do more of?
- What would you like this person to change or improve upon?
- Are there any other comments you would like to share, such as things you appreciate about this person or additional development suggestions?

The comments are organized by feedback provider source, and each bulleted item is a comment from one person.

What does this person do especially well that you would like him/her to continue to do more of?

Comments from your Primary Manager

- Pavan delivers. He was engaged in head count and talent acquisition in 2025 and he definitely delivered. In 2026 his role is now changing to pure technology delivery and he has delivered AI Claims MVP1.

Comments from your Secondary Manager

No comments were provided.

Comments from your Direct Reports

- He does an excellent job of supporting the team and providing the guidance needed to achieve our goals. He ensures there is minimal supervision while avoiding micromanagement, which gives team members the confidence and ownership to manage their work effectively. He also encourages strong cross-functional collaboration and stakeholder management, helping the team work well with different groups. I appreciate that he gives us the space to evaluate plans, share different perspectives, and engage in healthy debate or challenge ideas when needed. Another strength is that he encourages us to take ownership and remain accountable for the decisions we make. At the same time, when things do not go as planned, he stands by the team and provides the support needed to navigate challenges. This creates a sense of trust and responsibility within the team. His open-door approach makes him approachable and creates a positive environment where team members feel comfortable discussing ideas, concerns, and feedback. I would like him to continue fostering this supportive, empowering, and collaborative leadership style.
- People friendly ; Strong stakeholder engagement ; Never say die attitude ; Strong delivery acumen
- I just want him to continue as a person who takes care of the team when they are in need. It is not always possible to satisfy everyone, should continue what our inner sense says is right for us and the company
- His empathy n dynamic leadership towards his resources makes him special. The way he communicates to ELT- leadership always add more value to the project. He listens to everyone, he meet and greets everyone, Very good at extracting work, He focus on a lot of stuff at same time. He wont cascade his stress but gives that room for reaching out and he take care of his team more than anything. I am sure he would continue this in future too.
- Keeps morale up of the team, has a feel of the floor and guides the leads on their roles.

Comments from your Peers

Comments from Others

- exceptional leadership in managing the team while consistently providing growth opportunities and empowering all leaders to contribute and succeed.
- I appreciate Pavan's people-first approach. He genuinely understands and takes time to listen, and makes an effort to support us not only professionally but also from the moral standpoint. His moral encouragement and positive attitude creates an environment where everyone feels valued and motivated.
- Pavan has been a good leader and mentor for me. Some of his strengths are strategic vision, empathy, executive presence and cross functional influence.

- Pavan exemplifies empowering leadership by giving the USET team the autonomy to drive outcomes. He serves as a role model, with a visible leadership presence that positively influences the environment. His strong influence and exemplary leadership attributes make a lasting impact across the organization. He also pioneers in AI adoption and Health & Wellness committee.
- Pavan Chidella, demonstrates strong expertise in current IT and technology trends, which reflects in his effective leadership. He manages the team exceptionally well and creates a positive, supportive environment. I truly appreciate his empathetic approach toward team members and his genuine care for employees' growth and well-being. He is highly articulate, makes thoughtful decisions, and handles both leadership responsibilities and team dynamics with great clarity and confidence. I'm proud to be part of his team and consider him one of the best leaders I've worked with.
- Thought leadership
- Good Orator with SMART Goals / Roadmap. Networks well and able to Leverage them.
- Continue establishing the relationship with the leaders and their leaders, this is helping the team.
- It is great to be a part of PC's org. He ensures that the work culture in his org is good enough and all the individuals get the relevant opportunities.
- PC listens to understand and quietly provides guidance toward meaningful solutions and strategic direction that drives efficiency and effectiveness.
- Respecting Individuals and giving comfort to every Team member works under him is the Greatest Personality Trait.
- Pavan(PC) maintains strong connections with people, and his effective stakeholder relationships enable him to generate valuable insights
- Pavan Chidella is more collaborative and Motivates team members and encourage to build college type environment, where we can enjoy the work and help business team in a better way.
- Pavan is an exceptional leader and motivator who builds strong relationships and connects with people effortlessly. His dedication, hard work, and commitment make him a true role model for aspiring leaders. We greatly admire his respectful and approachable nature, as well as his willingness to support and engage in discussions at any time. He possesses outstanding technical expertise combined with strong people and management skills, enabling him to lead teams effectively and deliver results consistently. I am truly grateful for the opportunity to work with and under Pavan's leadership. I have learned a great deal from his guidance, mentorship, and example, both professionally and personally.

What would you like this person to change or improve upon?

Comments from your Primary Manager

- Even though MVP1 was delivered, it was done by force not by creating a repeatable process and scalable team structure. It's a WIP. This is also the case in all other areas of the organization. The productivity metrics for the organization is still a derived metric and its needs to become automatic. Feedback to directs needs to be written and documented. We have had a couple of instances where the documented feedback has been found wanting. He also needs to develop his next level and start delegating so he is able to focus on the broader org. He is too focused on one initiative at the moment that needs to be extracted higher.

- Bit more methodical ;
- One area where I believe he could improve is providing more structured and timely feedback. While he gives the team a good amount of ownership and independence, it would be helpful to have more regular check-ins or feedback conversations to ensure we are aligned on priorities, expectations, and areas of improvement. At times, having clearer direction upfront on key initiatives, success criteria, or stakeholder expectations could help the team make decisions faster and reduce rework. This would also help ensure that everyone is moving in the same direction while still maintaining the autonomy and trust he provides. Overall, I appreciate his leadership style, and I believe adding more consistent feedback and clarity around expectations would make the team even more effective.
- No suggestions for improvement. But, his kind nature of believing everyone might need a caution.
- Pavan as a person is good and always thinks about the folks reporting to him, only thing i suggest is to have the right leaders supported to get good outcomes. His vision is always to help the company but the leaders reporting to him might not be rounded to achieve the goals.

Comments from your Peers

- 1. PC needs to slow down and balance his work & personal life.
- bring more domain knowledge to hyd LT
- Managing difficult stakeholders

Comments from Others

- Continue to communicate with partners to establish strong working relationships, to set appropriate operating models with AI Claims and to set appropriate ongoing governance..
- Regular Feedback
- Similar to the AI Claims initiative that helps finalize claim processing, we are looking to drive more such strategic projects from HHH
- He is already approachable and supportive. As he continues to grow as a leader, Providing even more regular feedback to team members could help individuals develop and reach their full potential.
- Continue to establish the benchmark for the team and continue to bring continuous changes to improve the performance of the team.
- While he is highly collaborative and thoughtful in evaluating options, there are occasions where quicker, tougher decisions may be needed to address challenges and maintain project momentum.

- I would like him to be more informed on the work that I am doing to support business. And also keep us more informed on the business impact that is there with the work that we are doing as individuals and as a team.
- NA
- This is not specific to Pavan, however, charting out the roles and responsibilities of each and every role at HYD office, would certainly help individuals & managers in setting up the right expectations. It further helps to measure the success of each individual in their roles.
- While Pavan has been very good at leading and guiding his staff I feel he can improve little bit in disseminating information on a timely basis. While this does not happen consistently but I feel it can be improved bit.
- Provide more Direct Feedback to enable reportees / Teams to work on actionable Insights
- Need to assess on a regular basis to validate on the results of the deliverables rather than trusting blindly.

Comments from your Primary Manager

- Pavan is a good tech delivery Director. To take steps to the next level, he would need to create a collaborative culture in the org in HO, Champion a process driven POD driven capability model, deliver on large initiatives like AI Claims, Cigna True, Next Gen PRIME, develop a STRONG AD and SR.Mgr levels, drive strategy and execution of capability and put strong metric driven agile processes in place. Thriving in chaos is good for a start up. At some point the Chaos needs to shrink and repeatability becomes prime.

- Gives his team the trust and confidence to work without fear and hesitation.
- Nope
- One thing I truly appreciate about him is that he leads by example. He demonstrates the same level of ownership, accountability, professionalism, and commitment that he expects from the team. This sets a strong standard and motivates others to take responsibility for their work and approach challenges with the right mindset. He also creates an environment where people feel trusted, supported, and empowered to make decisions. His ability to stand by the team during difficult situations, while also encouraging us to learn from those experiences, helps build confidence and resilience within the team. I appreciate his open and approachable leadership style, as well as the way he encourages healthy discussions, collaboration, and constructive challenge. Continuing to model these behaviors and further strengthening regular feedback and alignment conversations would help the team grow even more effectively.
